

AUTODash

Industry Segments

- Automotive OEMs
- Tier I & II Automotive suppliers

Developed on SAP ERP, AUTODash is an enhanced solutions built upon the “Best Practices” for Auto industries combined with KPIT Cummins manufacturing domain experience gained from the implementations done in this vertical. The result is a substantial reduction in the “Total Cost of Ownership” through faster implementation, business-ready-scenarios and fewer customizations.

AUTODash replaces fragmented distributed systems, disparate technologies and manual processes with a flexible, scalable and maintainable blueprint solution for Indian Small & Medium Enterprise (SME) that lets you add new core processes as your business grows. AUTODash puts the power of integrated core business solutions within the reach of mid sized AUTO companies, no matter what production model is used.

AUTODash enables adaptive manufacturing by closing the vital information loop between the plant floor and the enterprise resulting in a real time visibility into crucial business processes from design, production and scheduling to inventory, quality and after-sales allowing quick response to changes.

Benefits

- Easy adaptability to changing market conditions
- Keep costs down and ensure prompt and accurate order fulfillment
- More responsive to changing customer demands
- Optimize the entire production process to deliver what sells
- Adopt manufacturing Auto Best Practices
- Enjoy better visibility of transactions across the enterprise

Highlights

Material Management

- Support for supplier managed inventory, customer supplied inventory, blanket orders, releases and electronic Kanban
- Sub-contracting
- Stock reconciliation
- Support for lean manufacturing practices
- Scrap and rework tracking

Production Planning

- Yield Analysis report to indicate manufacturing efficiency
- Exhaustive executive information system which can be used by Production Planning (PP) department for proactive planning
- Advanced inventory control with material planning
- Respond quickly to customer schedule changes
- Product traceability
- Product development cost analysis
- Production cost analysis
- Product traceability and customer service
- Interface to OEM sub portals

Costing and Profitability

- Product wise profitability reports
- Customer wise profitability reports
- Segment wise profitability reports
- Tooling, jig and fixture job costing control

Design and R & D

- Tracking product promotion, development and prototype costs
- Engineering change control and effectively dates for bill of material changes
- Milestone and document tracking system

Quality Management

- Quality check in procurement, process and sales
- Vendor performance analysis on quality, accuracy and due date compliance
- Quarantine and non- conforming product control

Sales and Distribution

- Extensive and flexible sales and margin analysis by customer, product, territory and sales representative
- Order and amendment tracking system
- Customer returns and customer service
- Warranty Management

Deployment using Solution Manager

- Project Documentation
- Implementation Roadmap
- Maintenance Optimizer

Integrated Dashboards

- On Demand Reports
- Predefined KPI based dashboards
- Quick start use of BW
- Reduced Advanced Business Application Programming (ABAP) development
- Personalized reporting

Proven Excellence

- 60+ years of consulting experience in manufacturing
- 75+ active manufacturing customers
- SAP India Channel partner
- SAP Service Partner
- SAP Domain experts and implementation experience
- Solution developed, enhanced and tested by domain experts from the AUTO Industries in KPIT Center of Excellence (CoE)
- Over 50 years of domain expertise in Manufacturing and Business Consulting
