

# Leading Cable Manufacturer. ( AM, PP and CO Implementation)

## Products Utilized

SAP R/3 4.7

## Project Duration

Phase I :  
4 Months

## Role of KPIT Consultants

FI,CO,AM,PP

### **BUSINESS NEED**

- Client is on SAP since last 5 years and want to implement Costing and Production Planning modules to have transparency and discipline because of multi location production facilities.
- Multi location of production facilities needs effective & strong product costing & production planning system which will facilitate
- To facilitate production cost comparison between the plants and optimizing the production.
- To have detailed record of Fixed assets which will facilitate quantity control and Accounting of the same.

### **CHALLENGE**

- The client is on SAP since last 5 years and implementing PP & CO and asset accounting modules has an effect on existing processes of other modules.
- Developing Activity confirmation system to have detailed reporting on Production planning \_
- Automating Asset sale process through sales & distribution module.

### **IMPACT**

- Automation and control over Asset sales process and disciplined accounting of fixed assets
- Mfg. cost comparison across plants available which facilitates decision “where to produce”.
- Discipline over material requirement planning in turn reducing Inventory levels
