

Abstract

The customer a leading manufacturing company with diverse product portfolio and a global presence had begun a DSS/business intelligence initiative to cater to the management information requirements.

KPIT Cummins team was responsible for the analysis, design and implementation of the business intelligence solution.

Challenges

The customer had begun a DSS/business intelligence initiative to cater to the management information requirements. They wanted a system that would help them evaluate critical business performance parameters. The project was planned for the following key applications:

- Monitoring KPIs using dashboards
- Customer profitability.

The Technologies

- Oracle 8i, PL/SQL,
- Cognos Powerplay,
- Cognos visualizer
- Cognos IWR

System to evaluate the Critical Business Performance Parameters

The Solution

KPIT Cummins team was responsible for the analysis, design and implementation of the business intelligence solution. Requirement gathering and data modeling were conducted onsite. Business case for the data mart was developed and deployed. The system offered dashboard reporting to be assuring the success of business performance using Key Performance Indicators (KPIs).

Value Delivered:

- Dashboard reporting provides a global picture of revenue for the day and month
- Cognos products like Impromptu and PowerPlay used for generation of a range of analyses and reports
- Reports published on the web using Cognos upfront tools

KPIT Cummins are a focused, and experienced IT consulting partner for industry leaders across the globe. Our core competencies in the manufacturing vertical include e-Business solutions, enterprise applications, business intelligence and data warehousing, application integration and embedded systems. Benefits of working with KPIT Cummins accrue from:

- Solution experts helping companies succeed
- Applying best industry practices
- Realizing the advantages of the Global Delivery Model (GDM)
